Information

Basic measurements scheme

The Model is based on the Kukka Cardigan of Rosa P. which you can find on Ravelry.
In order to know the details on how to knit this sweater, you need to buy the model from Rosa P.
<https://rosape.de>
<https://www.ravelry.com/patterns/sources/rosa-p-on-ravelry/patterns>

This Model is calculated for a specific person's size and a specific gauge of 20 stitches and 30 rows for a 10x10 cm or 4 inch square.

The calculation of the Model is based on a free app called Woolmi.
I have used the schematics and calculated stitches/rows/increases/decreases as produced by Woolmi.

I think Woolmi and RowCounter are both wonderful Tools as first attempts to automate, standardize and personalize Knitting Models.
