hook: USL/8mm

Pattern Instructions

Base

Chain 47

R1: Hdc in 3rd chain from hook and in each chain across row (45 st)

R2-33: ch 2 (does not count as a stitch), hdc in the back loop across row (45 st).

At the end of row 30, the hat is a rectangle of ribbed crochet that measures approximately 15" wide by 22" tall.

Note that in the photo below, I've rotated the work so that the rectangle is positioned as it will be when the crochet hat is complete. The crochet hook is positioned after finishing the last row of crochet stitches in preparation for the seaming the crochet hat.

Now for the finishing touches for our chunky crochet winter hat pattern!

Seam

How to Seam the Hat:

Chain 1 and turn work. Take the bottom of work and fold up so that the starting edge is on top of the row to be worked.

The seam is worked by slip stitching the two ends together as follows: Insert crochet hook into starting chain and then into the back loop of the next stitch to be worked. Slip stitch together.

Continue to slip stitch both ends together across row, making sure to work the slip stitches loosely and not too tight so that the hat remains stretchy. Note that this is the **WRONG** side of the work.

crochet fabric with crochet hook inserted into a stitch

At the end of the row, cut yarn (leaving a long strand for cinching the top) and fasten off.

Now the work is in a tube with the wrong side facing out. Rotate work and thread the fastened off yarn end on to a yarn needle. Work a running stitch with the yarn around the open end to gather the top.

Pull yarn tight and tie a knot to secure. The end from the start of the project should be there too and you can tie those 2 ends together too into a knot.

There will still be a small hole at the top, so continue to use the threaded yarn needle to make stitches to close up the hole. When done, knot the yarn again and then weave in all the ends.

Turn the hat right side out and fold up the brim. Or skip the fold up brim for a slouchy hat look instead! Put the cozy bit of goodness on your head and marvel at your amazingness!
